

Occlutech Group Acquires NonWoTecc Medical GmbH

Schaffhausen, Switzerland January 12, 2013 - Occlutech Holding AG today announced it has successfully completed the all-share acquisition of NonWoTecc Medical GmbH, a privately-held nanotechnology company based in Cologne, Germany.

NonWoTecc Medical GmbH is a technology company specializing in developing nanotechnology-based coatings and coverings for medical devices, including occluders, stents and vascular grafts. The company owns a CE-marked product and has a significant patent portfolio covering its technologies and their application for cardio-vascular indications. Occlutech and NonWoTecc have collaborated together since 2010.

“We welcome the NonWoTecc team to Occlutech”, said Tor Peters, CEO of the Occlutech Group. “This acquisition allows us to accelerate our ongoing joint development programs and initiate new ones faster. Furthermore, Occlutech is taking another significant step towards having a unique and propriety technology base that we intend to use to develop superior products for the benefit of patients”.

The Occlutech Group (www.occlutech.com), is a leading European medtech company specializing in the development, manufacture and sale of proprietary products for the treatment of pediatric and adult interventional cardiology uses. The Group operates facilities in Sweden, Germany and Turkey and has a global footprint with product sales in over 50 markets. Occlutech has an extensive pipeline consisting of innovative, next-generation devices for the repair of structural heart defects and other cardiovascular indications.
